# TAKE STOCK APP

screen designs

Splashscreen

App Icon

UNLOCKING VALUE
IN THE FOOD INDUSTRY
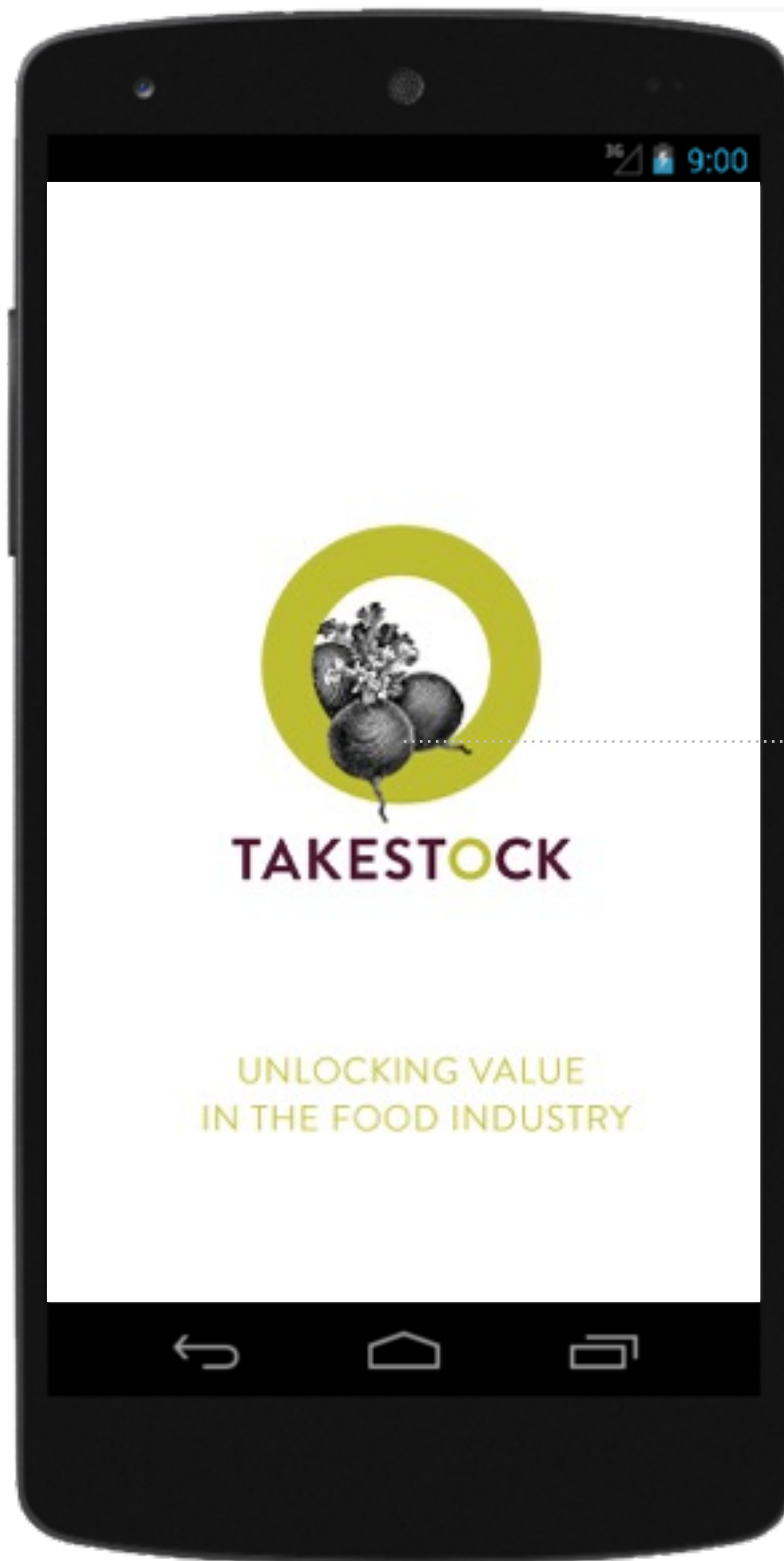

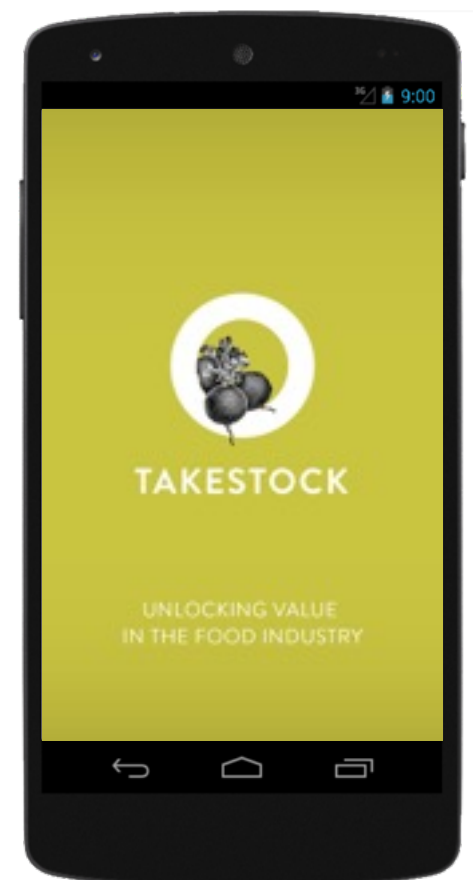

Alternative Design (green)

1. Search products
(Back dims to 25%)

2. 'Browse by category'
Page with list of categories
slides in from right

3. "Sell something" button
leads to sell page (see below)

4. Mobile menu bottom gives
easy access to the 3 actions:
- buy (search or browse products,
- My items (dashbord)
- Sell (sell page)

Web-app design as alternative with
dropdown menu?

I think its not action focussed as a
native app should be (jh)

Back function

… .more' In top-bar
holds additional functions
that are not covered by
the bottom navigation
(like help .. etc)

SELL SOMETHING

< home   SELL SOMETHING   ...

?

ADD IMAGES

Add Image
Big and the firs action a
seller should take (see next page)

Add product title
auto save after product title is
added, it will then be listed in the
dashboard as 'unfinished'

Add product title   ?

SELL SOMETHING PAGE

in the first instance the user is asked to add
an image and to add a product title.

Once a title is given the rest of the form
will appear below and the user will have
the choice to finish the form
and "Preview & Make live' or
'Save and put on hold' any time

CANCEL

Cancel
if no image is taken and no title

BUY   👤³   SELL
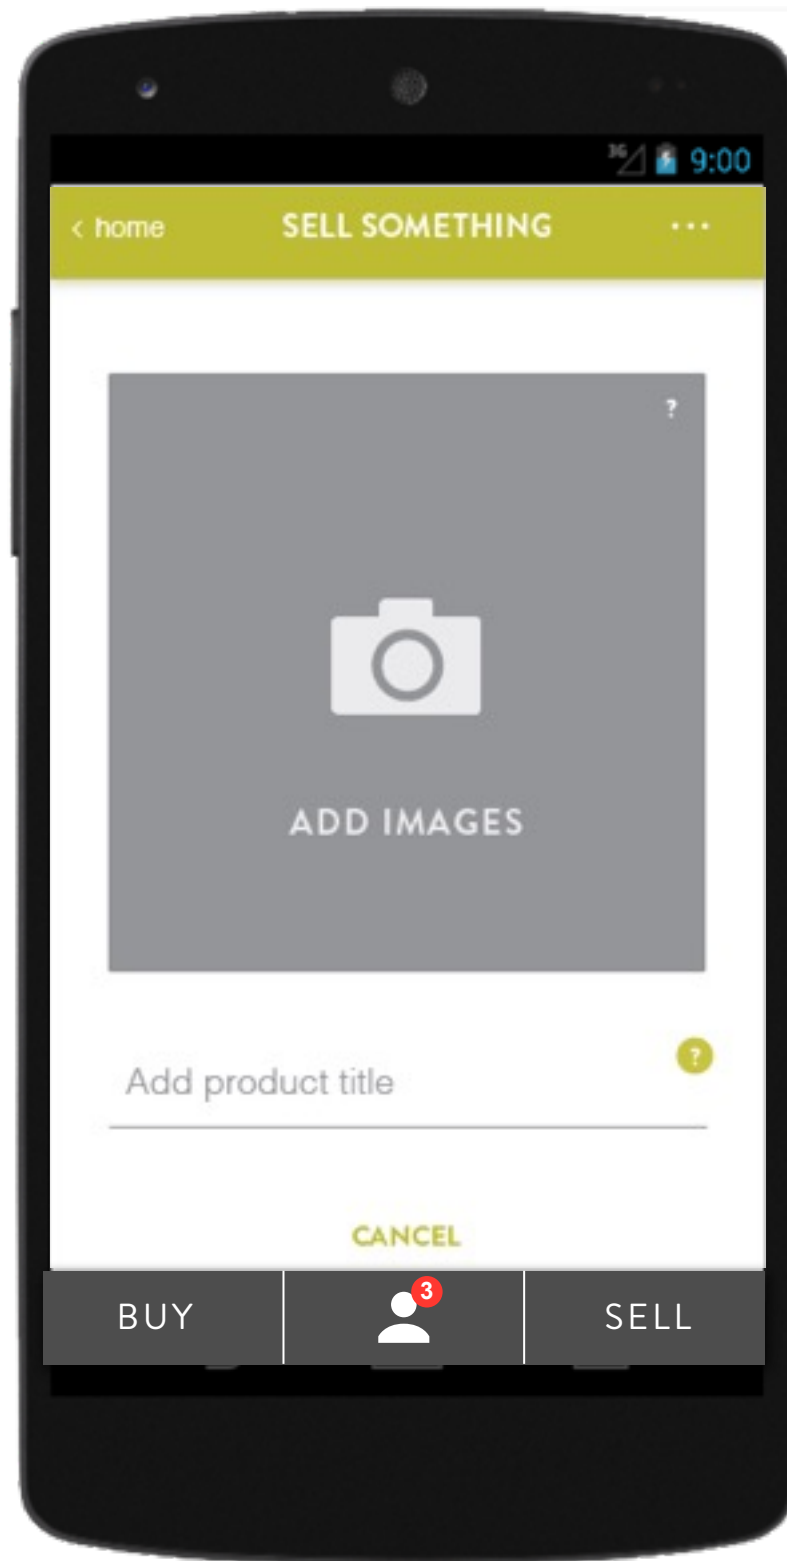

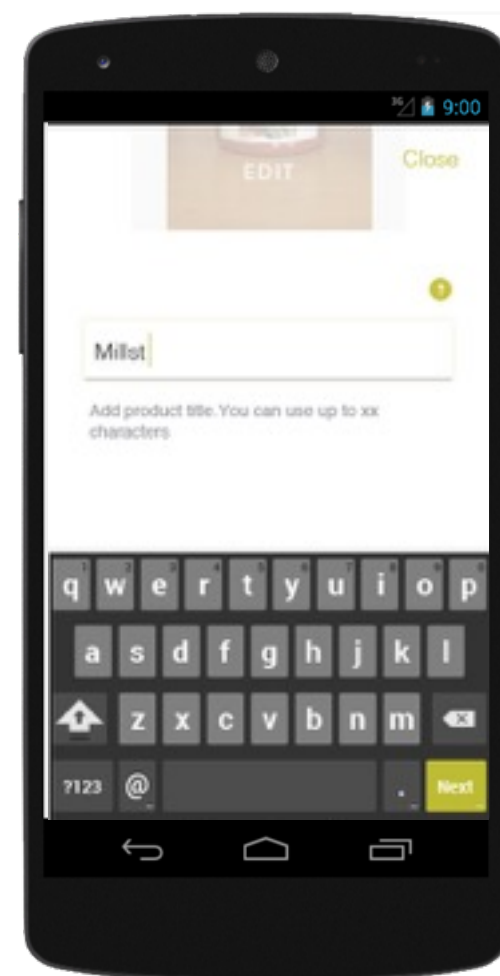

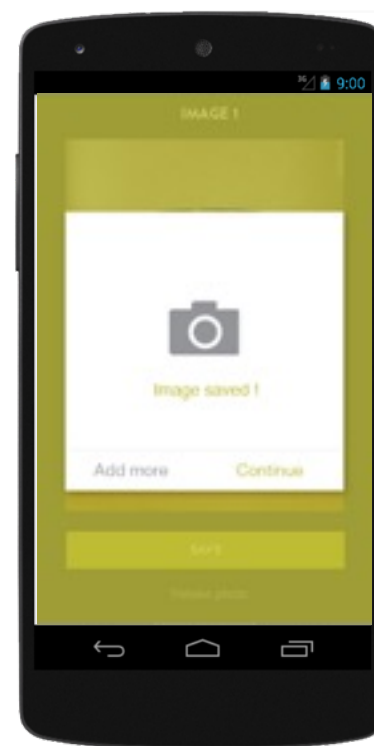

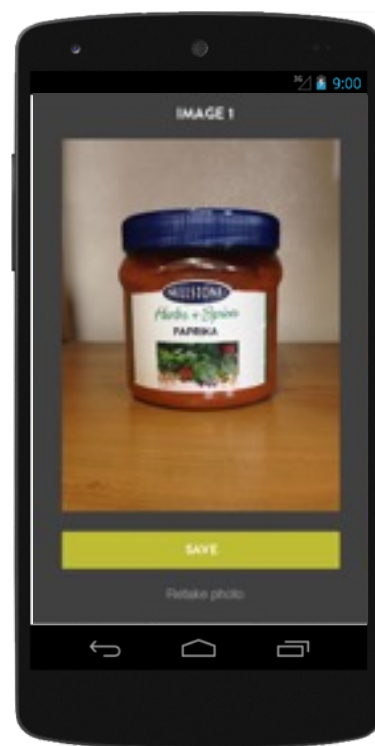

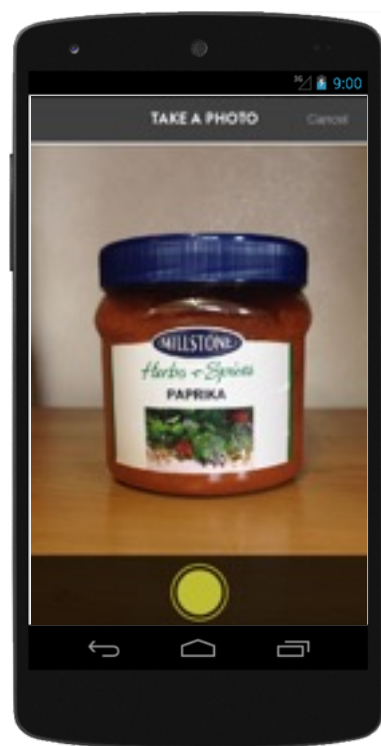

TAKE A PHOTO AND ADD TITLE

Dialogue choice between take photo or add photo from library

>

Take photo (Camera view find

>

Save or retake photo

>

Confirmation that photo is saved choice add more or continue

>

Fill in Product title (next button will continue with rest of the form, See next page)

These are the TS-app screens so as requested.
Please add comments into the presentation if possible and let me know your feedback.

Dashboard and Bidding process would still need to be designed, but I believe most element to build the app are now there
